

## Assignment 10 – Clean up the story - 10 points

### Purpose

For this assignment, you will read a file that has a great children's story in it. It is messy with all sentences together and hard to read. You will read the file and print each sentence on a separate line. If the sentence begins with " (meaning it is being said by a character) then you will indent that sentence by 5 characters.

Get the file, tale.txt, from brightspace in the homework folder.

### Required Python Comment

Place a Python comment at the top of your submission that is formatted as follows.

```
# -----+
# Your name | <-- e.g. Ashley Bertrand
# CSCI 107, Assignment 10 |
# Last Updated: Month Day, Year | <-- e.g. September 13, 2018
# -----+
# A brief description of the assignment. + <-- can be more than 1 line
```

**Hint: make sure to look at all the helper functions for strings**

### Submittal details

- Due Date: Friday, December 6th no later than 11:59 p.m.
- Partner Information: Everyone must complete this assignment individually.
- Submission Instructions: Upload your solution, entitled **YourFirstName-YourLastName-Assignment10.py** to the BrightSpace Assignment 10 Dropbox.
- Deadline Reminder: You will not be able to submit after the due date/time.

### Grading Rubric

- 1 point – Comment at top of source file
- 5 points for printing each sentence on a separate line
- 4 points for indenting the sentences that are spoken by a character in the story
